

GRAFFITI REMOVAL

5 Exclusive Solutions for virtually any surface!

Before

After

Seal U.S. graffiti removal solutions have been used on surfaces ranging from automobiles to trees. Our wide range of solutions are specifically formulated to address your commercial, industrial, residential, and personal needs while remaining 100% environmentally friendly. We even offer a solution to remove the "ghosting", or "shadow" left behind from previous unsuccessful graffiti removal attempts. Porous surfaces, smooth surfaces, and even the most gentle surfaces no longer have to be plagued with the unsightly appearance of graffiti and its remnants. The experts agree that Seal U.S. solutions work where other products and services fail.

Before

After

**Worried about repeat graffiti offenses,
or want to protect your new surface
from graffiti attempts?**

Seal U.S. offers a solution to this annoying occurrence. Our all surface no stick coating provides an invisible barrier to prevent otherwise difficult to remove soils from adhering to your surface. When this surface guard is in place, it greatly reduces the labor involved to remove future vandalism attempts. Our process can be applied to all types of metal, plastic, glass, ceramic, concrete, stucco, brick, wood, natural stone, and painted surfaces.

**Finally a graffiti
solution that
actually works!**

Removes unsightly graffiti from virtually any surface including; brick, stone, masonry, plastic, aluminum, wood and many other surface compositions. Our process is even gentle enough to be used on your vehicle's clear coat, and non-clear coat surfaces. Each of our solutions is 100% Environmentally Friendly and have even been awarded by the Canadian Government with the prestigious "Environmental Choice Certificate".
