

WOOD SEALANT

It's not a topical surface sealant!

DynaWood™ has been developed to extend the life of all your wood based products. DynaWood™ is a water-based, non-toxic, non-flammable product that contains NO VOC'S and is totally safe to use.

DynaWood™ when applied to permeable wood will produce just below the surface of the wood, a layer of silicate impregnated cells, which can breathe but will not allow the transmission of moisture, from above OR below.

ADVANTAGES:

- A PERMANENT internal membrane from a "One-Time" application
- A limited 30 YEAR product performance guarantee
- Waterproofs, petrifies & strengthens the wood
- Increases resistance of wood to weathering, abrasion and staining
- Non-toxic, environmentally and eco friendly
- Your wood and any secondary coatings you put on will last longer

UNPROTECTED

PROTECTED

Certified
By Nature
™

Wood Sealant is best used on Decks, Fences, Rails, Spindles, Cedar Siding and Shingles, and Log Homes. Anything made of wood needing a longer life.
